VERNON KIM KUTSCH, D.M.D.

A PROFESSIONAL BIOGRAPHY

Dr. Kutsch received his DMD degree from the University of Oregon School of Dentistry in 1979. Lecturing extensively on an international basis, he also acts as product consultant and inventor for air abrasion, lasers, and adhesive and cosmetic dentistry, and dental caries. As an author Dr. Kutsch has published dozens of articles and abstracts on caries risk assessment, dental caries as a biofilm disease, minimally invasive dentistry and laser dentistry in both dental and medical journals, has been a contributor to several texts, and has served as an editorial staff member for Reality. He also sits on the editorial board and acts as a reviewer for several dental journals. As an inventor he holds numerous patents for air abrasion devices, powders, nozzles and methods, cosmetic dental materials and methods, and dental caries diagnostic and treatment products. He is past president of the International Academy of Laser Dentistry, as well as the Academy of Laser Dentistry. Holding a Category III mastership in Lasers in Dentistry, he is a fellow of the American Society of Lasers in Medicine and Dentistry. He is also founder, fellow, diplomate and first president of the World Congress of Minimally Invasive Dentistry. In addition, Dr. Kutsch is a founder sits on the Board of Directors for the World Clinical Laser Institute, and is a member of the ADA Dental Materials Laser Committee. He has served on the board of directors of the American Academy of Cosmetic Dentistry, and University Relations Committee. Dr. Kutsch was founder and President of Kreativ Microdentistry Systems, and Cosmetic Dental Materials Inc. He also serves as an expert witness and regularly mentors dentists on a variety of topics. He is a founding member of the Rendezvous annual dental meeting in Baker City, Oregon. Dr. Kutsch serves as Chief Executive Office and Chief Technical Officer of Oral Biotech, manufacturers of the Carifree System. Dr. Kutsch is truly a pioneer in minimally invasive dentistry and digital practice, maintaining a comprehensive care dental practice in Albany, Oregon.

VERNON KIM KUTSCH, D.M.D.

EDUCATION:

- 1976 Westminster College, Salt Lake City, Utah
Bachelor of Science, Summa Cum Laude
Alpha Chi Honor Society
- 1979 University of Oregon Dental School, Portland, Oregon
Doctor of Dental Medicine, with honors
Delta Phi Omega Honor Society
Omicron Kappa Upsilon Honor Society
Psi Omega National Council

POSITIONS/AWARDS:

International Academy of Dental Research
International Academy of Laser Dentistry - past president
Academy of Laser Dentistry, co-president, 1993
Category 3 Certification Mastership
Institute for Laser Dentistry, clinical instructor
Laser Surgery Education Group, faculty member
Leon Goldman Award for Clinical Excellence, ALD 1993
Reality Publishing, Inc., editorial staff member
Experdent Centers for Dental Excellence, faculty member 1999 - 2002
American Academy of Cosmetic Dentistry – board member 1999-2001
Dental School Affiliation Committee, Matrix Band member
World Congress of Microdentistry – president, Founding member 2000
Fellowship 2000, Diplomat 2001, Leadership Award – 2002, past-president, executive director
The Rendezvous – founding member 2001-
The Best Dentists in America 2003

PROFESSIONAL EXPERIENCE

7/79-7/83, Corvallis, Oregon

7/82-present, Albany, Oregon

Private practice of general dentistry, including:

microdentistry, cosmetics, lasers, endo surgery, perio surgery, and implants, expert witness, independent lecturer, educator, clinical and research

investigator, product consultant for laser dentistry, air abrasion,

microdentistry, Photo-polymerization, Bleaching, Photosurgery. Complete

digital practice, CAD/CAM, digital radiography. Clinical experience with

Argon, CO₂, Nd:YAG, Ho:YAG, Er:YAG, Er:YSSG, and Diode lasers. Founder

and president of Kreativ, Inc., a high-tech dental products company producing particle beam and HEPA filtration technology, microdentistry restorative

products, new evolution curing and optical products, and soft tissue

instruments. Served as Chief Technical Officer Kreativ Microdentistry

Systems Inc, and Welch/Allyn Dental Products and faculty member for

Experdent Centers of Dental Excellence. Currently serves as CEO and CTO for

Cosmetic Dental Materials, Inc, and Oral Biotech, LLC, dental materials and

VERNON KIM KUTSCH, D.M.D.

equipment manufacturers of materials and systems based on Dr. Kutsch's related patents.

TESTIMONIALS

I attended your October course in Victoria, BC and I greatly enjoyed it. I had a financial plan in mind but it certainly was nowhere near as detailed as the one I have now after listening to your speech. Your enthusiasm with respect to dentistry was contagious and this was something I terribly needed. Dr. Adriana Lauran-Mousseau

“Dr. Kutsch's method of presenting the material was both informative and interesting – I liked his approach. The procedures are vital in today's market for dentists to remain competitive.”

-Dr. Norman Hanson

“I am a course junkie. I have been to them all. Dr. Kutsch's seminar was without a doubt THE most informative, THE most interesting, THE most entertaining program that I have attended in a long time. Attend this lecture, you will love it.”
Dr. Tony Nunez

Course Outline:

Dr. Kutsch covers a variety of material in his courses from a complete overview of integrating high-tech dentistry into the dental practice. He presents on lasers, digital practice, digital radiography, CEREC, microscopes, perioscopy, dental thermoplastics, in-office whitening, to caries and periodontal risk assessment. The content can provide information from the decision making process with financial ramifications to the actual systems development and integration of new technologies. While specifically designed for dentists, the course is also appropriate for the entire dental team. The presentation examines why the second most respected profession can also be the most psychologically damaging, and the reason dentists are hesitant to adopt new technologies. The program can provide a complete discussion of the digital practice beginning with strategic planning, digital integration considerations, the new patient digital experience and patient management, and also specific considerations for the digital operatory. Additional focus will be spent on the philosophy of microdentistry in the digital practice with historical perspectives, scientific support, and clinical examples, with an

VERNON KIM KUTSCH, D.M.D.

opportunity for a hands-on demonstration. The dentist will learn and understand a model of health that involves absence of disease, rather than absence of symptoms. In addition the dentist will learn about the need for early caries detection in an age of fluoride, the rationale for minimally invasive treatment, the advantages of glass ionomer and cosmetic adhesive restorations, and the opportunities that benefit maximum patient comfort. The dentist will leave with a completed form for a strategic plan to integrate these technologies and microdentistry into the practice, as well as an appropriate understanding of the future digital office. Dr. Kutsch is an expert on minimally invasive dentistry, caries and periodontal risk assessment and the medical model of disease management. He can also present on the patent process, and how to give a public presentation.
